

Samuel Catalano

Ranked #1 Software Engineer in the world according to my parents.

samuel.catalano@gmail.com

HEY, WHAT'S UP? GET TO KNOW ME A LITTLE MORE!

Highly skilled Software Engineer with over 17 years of experience in the IT field. Proven expertise in software development, systems administration, and requirements analysis. Demonstrated leadership skills and a passion for technology and innovation. Committed to delivering high-quality results and meeting new challenges.

WHAT I LOVE TO DO

EDUCATION

Bachelor of Computer Science – Pontifícia Universidade Católica de São Paulo
Specialisation in Software Development: 2003 – 2008

WORK EXPERIENCE

Senior Software Developer
Tribal Worldwide London - Full-time
Jun 2024 – Present
London, England, United Kingdom

Stock Archiver Force (Stock Importer, Stock Archiver, Stock API, Stock Exporter) archives vehicle stock data and associated product, configuration and image data. Its API provides access to stock information supplied by VW, as well as archived stock information.

Responsibilities:

- Build APIs using the Spring Boot framework.
- Develop new features and tools using Spring, MySQL, MongoDB and ActiveMQ.
- Create unit tests using JUnit and Mockito.
- Participate in client meetings and demonstrations.
- For the past year, I've been working as a tech lead to structure new microservices that leverage AI, using a basic framework: *AGENTS.md* for agent instructions, *skills/<skill>/SKILL.md* for reusable capabilities, *mcp.json/config MCP* to define external tools and integrations, and *prompts/*.md* for domain-specific prompts and rules.

Stack: Java 17, Spring Boot, Microservices, Databases, JSON, Apache POI, AWS Lambda, SFTP, MySQL, PostgreSQL, Docker and Kubernetes

Software Developer III
OLM Systems - Full-time
Jul 2021 – Feb 2024
London / Glasgow, United Kingdom

The Child Protection – Information Sharing project (CP-IS) helps health and social care staff share information securely to better protect society's most vulnerable children.

Responsibilities:

- Built APIs using the Quarkus framework.
- Integrated Quarkus with Kafka, Debezium, PostgreSQL, MySQL and SFTP.
- Participated in client meetings and demonstrations.

Stack: Java 11, 14 and 17, Quarkus, Microservices, Databases, JSON, Kafka, Debezium, AWS Lambda, SFTP, MySQL, PostgreSQL, Docker and Kubernetes

Senior Java Software Engineer
xDesign - Full-time
Nov 2020 – May 2021
London, England, United Kingdom

Space Jam project: integrated Onfido to provide document upload and verification in FanDuel's onboarding application.

The application was designed for use in the USA. Data extracted from uploaded documents by Onfido was cross-referenced with information captured in the applicant's onboarding form to verify their identity. The verification checks themselves were outside the team's scope.

Stack: Java 14, Spring Boot, Microservices, Databases, JSON, Terraform, AWS Lambda, AWS SNS/SQS, Webhook, MySQL, Python

Senior Java Engineer
Millimetric.ai - Full-time
Apr 2020 – Nov 2020
London, England, United Kingdom

A platform that analyses data around the clock to identify, in real time, when, where and why unusual activity occurs in business metrics.

Stack: Java 11, Spring Boot, Spring Data, Cassandra, JSON, AWS, RESTful APIs, Microsoft SQL Server

Software Engineer
Reclame AQUI - Part-time
Dec 2017 – Apr 2020
São Paulo, Brazil

A platform where consumers register their details and submit complaints. The site's privacy policy prevents consumers from being identified on public pages, as complaints are indexed by search engines and publicly accessible. Personal details are shared only with the company involved to help resolve the issue. Companies registered to respond on the site receive complaint details by email. The resulting data is used to generate automated rankings, and Reclame AQUI evaluates companies against several criteria.

Stack: Java 11, Spring Boot, Hibernate, PostgreSQL, JSON, AWS, GCP, Keycloak

Software Engineer
Mira Educação - Full-time
Jan 2017 – Aug 2017
São Paulo, Brazil

Back-end developer at Mira Educação, a startup that seeks to improve learning in basic education. Its focus is to understand how students learn inside and outside the classroom and propose actions to maximise their potential.

Responsibilities: After onboarding to the public education platform, I built new APIs for the mobile team's iOS and Android applications. This was also my first professional experience with microservices and Spring Boot.

Stack: Java 8, Spring Boot, Hibernate, MySQL, JSON, iOS, Android, shell scripting

Mobile Software Engineer
Taqtile - Full-time
Jan 2014 – Feb 2016
São Paulo, Brazil

Software engineer at Taqtile in São Paulo, Brazil, working in the operations team. The team implemented improvements and new features in mobile applications using technologies such as iOS, Java, Android and CoffeeScript.

Responsibilities: I worked on US projects, fixing issues and implementing improvements and new features in applications already released by the company.

Stack: iOS, Android, Ruby, JSON, Heroku, JavaScript, Jade, Xcode, Android Studio.

Mobile Application Developer
Insane Games - Full-time
Mar 2012 – Oct 2013
São Paulo, Brazil

Responsibilities: I developed iOS and Android applications using Appcelerator Titanium, SQLite and JSON, and managed the applications in the app stores after release.

Java Web Developer
Arizona Premedia and Market Automation - Full-time
May 2011 – Feb 2012
São Paulo, Brazil

Project: Arizona.Retail – A product designed for large retail customers in Brazil to create, review and lay out promotional leaflets, then send them to printers. Technologies included J2EE, Hibernate, Spring MVC, web services, JSON, JavaScript, jQuery, FreeMarker, Struts 2, MySQL, Tomcat and AJAX.
