Senior. Java Software Engineer
xDesign - Full-time
Nov 2020 – May 2021
London - England, United Kingdom

Space Jam project: Integrate with On-Fido to provide Document Upload and Verification in FanDuel's onboarding application.

The application is to be utilised in the USA, with the data scrape of uploaded docs cross (done by on-fido) referenced against information captured in the applicant onboarding form to verify the identity of the applicant (this verification set is out of the scope of the work of this team).

Stack: Java 14, Spring Boot, Microservices, Databases, JSON, Terraform, AWS Lambda, AWS SNS/SQS, Webhook, MySQL, Python

Sr. Java Engineer
Millimetric.ai - Full-time
Apr 2020 - Nov 2020
London - England, United Kingdom

A platform which analyses your data around the clock to let you know in real-time when, where and why unusual activity in your metrics occurs.

Stack: JAVA 11, Spring Boot, Spring Data, Cassandra, JSON, AWS, RESTFUL, MSSQL

Software Engineer
Reclame AQUI - Part-time
Dec 2017 - Apr 2020
São Paulo - São Paulo area, Brazil

Platform in which consumers register their data and can send complaints. The privacy policy of the site does not allow the identification of the consumer in the publication of the pages, because the complaints made are indexed by search engines and visible for consultation. Access to the data that was registered by the client occurs only with the company involved, to facilitate the search for the resolution of the problem. Thus, an An email with the details is transmitted to the company involved, in case it has a register for responses on the site. With the data generated, are obtained automated rankings and Reclame Aqui evaluates the company using several criteria.

Stack: JAVA 11, Spring Boot, Hibernate, PostgreSQL, JSON, AWS, GCP, KeyCloak

Software Engineer
Mira Educação - Full-time
Jan 2017 - Aug 2017
São Paulo - São Paulo area, Brazil

Back-end Developer at Mira Educação. A startup that seeks to improve learning in basic education. Our focus is to understand the dynamics of student learning in and out of the classroom and to propose actions to maximize their potential.
Responsibilities: I started the work by receiving the necessary knowledge to work on a public education platform, more specifically in building new APIs for the mobile team (iOS and Android) to consume. Also was my first experience using microservices and Spring Boot professionally.

Stack: JAVA 8, Spring Boot, Hibernate, MySQL, JSON, iOS, Android, Shell Script

Mobile Software Engineer
Taqtile - Full-time
Jan 2014 - Feb 2016
São Paulo - São Paulo area, Brazil

Software Engineer at Taqtile, São Paulo, Brazil Since June 2014. Developer in the Operations Team. This team is responsible for realising some improvements and new features in mobile applications. This development team uses technologies like iOS, Java, Android and CoffeeScript.

Responsibilities: I was responsible for the USA projects to fix some issues and implement improvements and innovations on the applications already launched by the company.

Stack: iOS, Android, Ruby, JSON, Heroku, JavaScript, Jade, Xcode, Android Studio.

Mobile Application Developer
Insane Games - Full-time
Mar 2012 - Oct 2013
São Paulo - São Paulo area, Brazil

Responsibilities: I am responsible for developing iOS and Android using Appcelerator Titanium, SQLite, and JSON. Once built, manage the applications at the stores.
